We may amend or terminate the deposit agreement without your consent. If you continue to hold your ADSs, you agree to be bound by the deposit agreement as amended.

To better understand the terms of the ADSs, you should carefully read the “Description of American Depositary Shares” section of this prospectus. You should also read the deposit agreement, which is filed as an exhibit to the registration statement that includes this prospectus.

We intend to use the net proceeds from this offering and the concurrent private placements as follows: (i) approximately US\$180 million for investing in our technology and research and development activities; (ii) approximately US\$180 million for expanding our sales and marketing activities; and (iii) the balance for other general corporate purposes, including potential strategic acquisitions and investments. Notes:

- (1) Our consolidated balance sheet data as of December 31, 2010 on a pro forma basis reflects the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares upon the closing of this offering.
- (2) Our consolidated balance sheet data as of December 31, 2010 on a pro forma as adjusted basis reflects (a) the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares upon the closing of this offering; (b) the net proceeds we will receive in this offering, and (c) the net proceeds we will receive from our issuance and sale of Class A ordinary shares to a group of third-party investors through concurrent private placements, in each of (b) and (c) above, assuming an initial offering price of US\$13.00 per ADS (equivalent to US\$4.33 per Class A ordinary share), the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus.

Because our initial public offering price is substantially higher than our net tangible book value per share, you will experience immediate and substantial dilution.

If you purchase ADSs in this offering, you will pay more for your ADSs than the amount paid by our existing shareholders for their Class A ordinary shares on a per ADS basis. As a result, you will experience immediate and substantial dilution of approximately US\$10.25 per ADS, representing the difference between the assumed initial public offering price of US\$13.00 per ADS, the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus and our pro forma as adjusted net tangible book value of US\$2.75 per ADS as of December 31, 2010, after giving effect to the automatic conversion of our preferred shares immediately upon the completion of this offering and the net proceeds to us from both this offering and our issuance of a total of 25,384,612 Class A ordinary shares through concurrent private placements. In addition, you may experience further dilution to the extent that our ordinary shares are issued upon the exercise of share options.

USE OF PROCEEDS

We estimate that we will receive net proceeds from this offering and the concurrent private placements of approximately US\$628.8 million, or approximately US\$726.1 million if the underwriters exercise in full their over-allotment option to purchase additional ADSs, after deducting underwriting discounts and the estimated offering expenses payable by us. These estimates are based upon an assumed initial public offering price of US\$13.00 per ADS (the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus). A US\$1.00 increase (decrease) in the assumed initial public offering price of US\$13.00 per ADS would increase (decrease) the net proceeds to us from this offering by US\$40.3 million, assuming the number of ADSs offered by us, as set forth on the front cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated expenses payable by us.

The primary purposes of this offering are to enhance our profile and brand recognition, create a public market for our shares for the benefit of all shareholders, retain talented employees by providing them with equity incentives, and obtain additional capital. We plan to use the net proceeds of this offering and the concurrent private placements as follows:

- approximately US\$180 million for investing in our technology and research and development activities;
- approximately US\$180 million for expanding our sales and marketing activities, including marketing programs on the internet, television, outdoor media and other formats to increase our brand recognition, promote nuomi.com and jingwei.com, and promote games on our online games center; and
- the balance for other general corporate purposes, including potential strategic acquisitions and investments.

The foregoing represents our current intentions based upon our present plans and business conditions to use and allocate the net proceeds of this offering. Our management, however, will have significant flexibility and discretion to apply the net proceeds of this offering. If an unforeseen event occurs or business conditions change, we may use the proceeds of this offering differently than as described in this prospectus.

Pending any use, as described above, we plan to invest the net proceeds in short-term, interest-bearing debt instruments or demand deposits.

In using the proceeds, as an offshore holding company, we are permitted, under PRC laws and regulations, to provide funding to our PRC subsidiary only through loans or capital contributions and to our consolidated affiliated entities only through loans. Subject to satisfaction of applicable government registration and approval requirements, we may extend loans to our PRC subsidiary and consolidated affiliated entities or make additional capital contributions to our PRC subsidiary to fund its capital expenditures or working capital. We cannot assure you that we will be able to obtain these government registrations or approvals on a timely basis, if at all. See “Risk Factors—Risks Related to Our Corporate Structure—PRC regulation of loans to, and direct investment in, PRC entities by offshore holding companies and governmental control of currency conversion may restrict or prevent us from using the proceeds of this offering to make loans to our PRC subsidiary and consolidated affiliated entities or to make additional capital contributions to our PRC subsidiary, which may materially and adversely affect our liquidity and our ability to fund and expand our business.”

We will not receive any of the proceeds from the sale of ADSs by the selling shareholders.

CAPITALIZATION

The following table sets forth our capitalization as of December 31, 2010:

- on an actual basis;
- on a pro forma basis to reflect the automatic conversion of all of our preferred shares issued and outstanding upon the completion of this offering into 725,668,320 ordinary shares; and
- on a pro forma as adjusted basis to reflect: (1) the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares upon the completion of this offering, (2) the conversion of our ordinary shares into Class A ordinary shares and Class B ordinary shares immediately prior to the completion of this offering, (3) the sale by us in concurrent private placements of 25,384,612 Class A ordinary shares, which share number has been calculated based on the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus, with net proceeds to us of US\$109.1 million, and (4) the issuance and sale by us of 128,696,133 Class A ordinary shares in the form of ADSs in this offering at an assumed initial public offering price of US\$13.00 per ADS (the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus), after deducting the underwriting discounts and commissions and estimated offering expenses payable by us.

You should read this table together with our consolidated financial statements and the related notes included elsewhere in this prospectus and the information under “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

(1) A US\$1.00 increase (decrease) in the assumed initial public offering price of US\$13.00 per ADS (the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus) would increase (decrease) each of additional paid-in capital, total shareholders equity and total capitalization by US\$40.3 million.

DILUTION

If you invest in our ADSs, your interest will be diluted to the extent of the difference between the initial public offering price per ADS and our net tangible book value per ADS after this offering. Dilution results from the conversion of our preferred shares and the fact that the initial public offering price per Class A ordinary share is substantially in excess of the book value per ordinary share attributable to the existing shareholders for our presently outstanding ordinary shares.

Our net tangible book value as of December 31, 2010 was approximately negative US\$169.4 million, or negative US\$0.66 per ordinary share as of that date, and negative US\$1.97 per ADS. Net tangible book value represents the amount of our total consolidated assets, less the amount of our intangible assets, goodwill, total consolidated liabilities and series C and series D convertible redeemable preferred shares. Dilution is determined by subtracting net tangible book value per ordinary share, after giving effect to (1) the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares immediately upon the completion of this offering, (2) the issuance and sale in concurrent private placements of 25,384,612 Class A ordinary shares, calculated based on the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus, with net proceeds to us of US\$109.1 million and (3) the issuance and sale by us of 42,898,711 ADSs offered in this offering at an assumed initial public offering price of US\$13.00 per ADS (the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus) after deduction of the underwriting discounts and commissions and estimated offering expenses payable by us. Because the Class A ordinary shares and Class B ordinary shares have the same dividend and other rights, except for voting and conversion rights, the dilution is presented based on all ordinary shares, including Class A ordinary shares and Class B ordinary shares.

Without taking into account any other changes in net tangible book value after December 31, 2010, other than to give effect to (1) the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares immediately upon the completion of this offering, (2) the issuance and sale in concurrent private placements of 25,384,612 Class A ordinary shares, calculated based on the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus, with net proceeds to us of US\$109.1 million and (3) the issuance and sale by us of 42,898,711 ADSs offered in this offering at an assumed initial public offering price of US\$13.00 per ADS (the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus) after deduction of the underwriting discounts and commissions and estimated offering expenses payable by us, our pro forma as adjusted net tangible book value as of December 31, 2010 would have been US\$1.1 billion, or US\$0.92 per outstanding ordinary share and US\$2.75 per ADS. This represents an immediate increase in net tangible book value of US\$0.49 per ordinary share and US\$1.47 per ADS to the existing shareholders and an immediate dilution in net tangible book value of US\$3.41 per ordinary share and US\$10.25 per ADS to investors purchasing ADSs in this offering. The following table illustrates such dilution:

	<u>Per Share</u>	<u>Per ADS</u>
Actual net tangible book value per share as of December 31, 2010	US\$ (0.66)	US\$ (1.97)
Pro forma net tangible book value per share after giving effect to (1) the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares and (2) the concurrent private placements	US\$ 0.43	US\$ 1.28
Pro forma as adjusted net tangible book value per share after giving effect to (1) the automatic conversion of all of our issued and outstanding preferred shares into ordinary shares, (2) the concurrent private placements, and (3) this offering	US\$ 0.92	US\$ 2.75
Assumed initial public offering price	US\$ 4.33	US\$ 13.00
Dilution in net tangible book value per share to new investors in the offering	US\$ 3.41	US\$ 10.25

The amount of dilution in net tangible book value to new investors in this offering set forth above is calculated by deducting (i) the pro forma net tangible book value after giving effect to the automatic conversion

of our preferred shares from (ii) the pro forma net tangible book value after giving effect to the automatic conversion of our preferred shares and this offering.

The following table summarizes, on a pro forma basis as of December 31, 2010, the differences between existing shareholders, including holders of our preferred shares, and the new investors with respect to the number of ordinary shares (in the form of ADSs or shares) purchased from us, the total consideration paid and the average price per ordinary share/ADS paid before deducting the underwriting discounts and commissions and estimated offering expenses. The total number of ordinary shares does not include ordinary shares underlying the ADSs issuable upon the exercise of the over-allotment option granted to the underwriters.

	<u>Ordinary Shares Purchased</u>		<u>Total Consideration</u>		<u>Average Price</u>	<u>Average</u>
	<u>Number</u>	<u>Percent</u>	<u>Amount</u>	<u>Percent</u>	<u>Per Ordinary Share</u>	<u>Price Per ADS</u>
	(in thousands of US\$, except number of shares and percentages)					
Existing shareholders	994,195,900	86.6%	US\$ 420,036	38.6%	0.42	1.27
New investors	154,080,745	13.4%	US\$ 667,683	61.4%	4.33	13.00
Total	1,148,276,645	100.0%	US\$1,087,719	100.0%		

A US\$1.00 increase (decrease) in the assumed public offering price of US\$13.00 per ADS (the midpoint of the estimated initial public offering price range shown on the front cover page of this prospectus) would increase (decrease) our pro forma net tangible book value after giving effect to the offering by US\$40.3 million, the pro forma net tangible book value per ordinary share and per ADS after giving effect to the automatic conversion of our preferred shares and this offering by US\$0.04 per ordinary share and US\$0.11 per ADS and the dilution in pro forma net tangible book value per ordinary share and per ADS to new investors in this offering by US\$0.30 per ordinary share and US\$0.89 per ADS, assuming no change to the number of ADSs offered by us as set forth on the front cover page of this prospectus, and after deducting underwriting discounts and commissions and other offering expenses.

The pro forma information discussed above is illustrative only. Our net tangible book value following the completion of this offering is subject to adjustment based on the actual initial public offering price of our ADSs and other terms of this offering determined at pricing.

The discussion and tables above also do not take into consideration any outstanding share options and issued but unvested ordinary shares. As of the date of this prospectus, there were 48,337,290 ordinary shares issuable upon exercise of outstanding share options at a weighted average exercise price of US\$0.42 per share, and there were 71,129,128 ordinary shares available for future issuance upon the exercise of future grants under our 2009 Equity Incentive Plan, as amended, and our 2011 Share Incentive Plan. As of the date of this prospectus, there were 27,690,530 issued but unvested ordinary shares. To the extent that any of these options are exercised and the unvested ordinary shares become vested, there will be further dilution to new investors.
